

- **Made of coated 304 stainless steel, offering excellent corrosion resistance,**
- **heat resistance, strength at low temperatures, and mechanical properties; resistant to rust**
- **Fast cable bundling with full range of specifications**

304 Stainless Steel Coated Self-locking Cable Tie

Key Features

- **Built-in stainless steel ball in the locking head ensures firm tightening and prevents slipping**
- **Made of genuine stainless steel material, offering excellent rust resistance and long-lasting durability**
- **Suitable for bundling heavy or rigid objects; high tensile strength and resistant to breakage**
- **Made with flame-retardant materials**
- **Operating temperature: -30 °C to +85 °C**
- **Weather-resistant: withstands rain, sun exposure, and humid outdoor environments**
